ARCHIAS' SEED STORE.

Advantages We Offer to Customers:

Sedalia, with a population of about twenty thousand, is situated in one of the finest farming sections of Missouri, with good shipping facilities, low freight and express rates.

We have railroads running out in six directions, and about fifteen mails daily.

WE OWN OUR STORE BUILDING and warehouse and have no rent to pay. Our cost for labor and advertising is about half that of houses in larger cities, therefore we can sell **the best seeds grown** lower than other houses in our line.

OUR SEEDS ARE SELECTED especially to meet the demand of Market Gardeners and Good Farmers, and are good enough for anyone, this having been our business for nearly twenty years.

OUR RESPONSIBILITY—We refer, by permission, to the Citizens' National Bank or to any Express or Railroad Office in Sedalia. Thousands trust their orders with us each year.

FREE SEEDS—We will give away 100,000 packets free seeds to our customers for 1902 as premiums. The larger the order the more free seeds you get. Have your neighbors order with you. It will pay you.

CASH PRIZES—On page 2 we give a list of prizes offered to our customers this season. We will sell you only **THE FINEST SEEDS GROWN** and want you to raise big crops and fine specimens. This pays you, and advertises us. We want every one of our customers to compete for these prizes in 1902. A more complete list will be published in the catalogue of the Missouri State Fair, which will be held at Sedalia next fall. Write the Secretary for a copy of the Fair Catalogue. We will publish a list of winners of our prizes in our 1903 catalogue.

WE DOUBLE TEST all Seeds, both as to vitality and purity, and we can conscientiously recommend Archias' Northern Grown "Sure Seeds" as Money Growers.

ARCHIAS' EVERGREEN LAWN GRASS.

"OUT O' SIGHT" MOLE TRAP.

The best Mole Trap ever offered. Full information sent with each trap.

\$1.00 Each.

Best mixture for a beautiful evergreen lawn—is a mixture of such grasses as will withstand the heat and dry weather of our summers.

The seed we offer is as pure and reliable as can be found anywhere.

To produce a good lawn, plow or dig up the surface thoroughly to a depth of 12 to 14 inches and mix the soil with well-rotted manure or bone dust, the latter being at all times preferable, as it is more durable in its effects and free from weed seeds, which are always contained in more or less quantities in stable manure.

The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 400 square feet. It will add \$500 to the value of any farm to have a nice lawn around the house. The most beautiful thing that can be placed about a home is a well-kept lawn. It is the soul of the surroundings of a home. Not only is it one of the most beautiful, but also useful, features of the landscape.

HERMET BRAND COMPLETE FERTILIZERS.

HERETOFORE the farmers in this vicinity have questioned the wisdom of the use of fertilizers, contending that fertilization was not essential to the growing of paying crops.

The intelligent and prosperous farmer of the present day is certain to be one who fully believes in and practices the excellent motto: **FEED THE SOIL AND THE SOIL WILL FEED YOU.** Crops cannot live and thrive on air and water alone. Their roots penetrate the earth and absorb therefrom the Nitrogen, Phosphoric Acid, Potash or other elements of plant life they require. In some form these must be replaced, otherwise the land would eventually revert to that deplorable condition usually described as "worn out."

We guarantee all our helmet Brand Fertilizers to be made wholly from Animal Flesh, Blood and Bone.

Stable manure is a true fertilizer--all of its plant food, viz: Phosphoric Acid and Nitrogen, is available to the plants--but it cannot compare in strength with the Animal Fertilizers.

Stable manure contains 1,600 pounds of water to the ton, or more than ten times as much as the Animal Fertilizers

It takes 30 to 40 cord of Stable Manure to equal the plant food found in 1 cord of Animal Fertilizers.

It takes vastly more labor to apply stable manure than to apply equal strength in Animal Fertilizers.

Ammoniated Dissolved Bone and Potash.

Cause of Increased Demand for Crushed Shell.

Corn has been dethroned in Missouri. Chicken is King! During the last twelve months the total shipment of poultry and eggs from Missouri has been \$12,571,467 83. This is an increase of almost \$500,000 over the previous year.

The State Labor Bureau has made some comparisons with these figures as a basis. Aggregating the shipments of wheat, corn, oats, flaxseed, rye, barley, timothy seed, clover seed, millet seed, cane seed, castor beans, broom corn, hay, straw and apples, and the Missouri hen beats the aggregation \$75,000.

Take all the products of forest and dairy, and the barnyard is still ahead.

Combine the values of the products of the coal mines, the nurseries and the orchards, and the hen is nearly \$500,000 ahead.

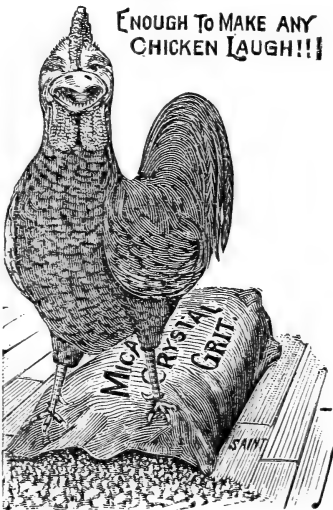

Poultry and eggs equal in shipping value one-fifth the receipts from all the cattle, hogs, sheep, horses and mules. The drouth has not affected the hen. The hot weather has made her fruit scarce and hard to keep. But she is still very much alive and in earnest.

The harvest of the barnyard will do much to offset the loss of the corn crop. Poultry has been regarded as one of the minor items in the farm products. The drouth may teach its importance and increasing value. If we cannot have roasting ears, there's yet fried chicken, and it isn't bad.—The Columbia Herald, of Columbia, Mo.

THE SURE HATCH INCUBATOR FACTORY, CLAY CENTER, NEB.

The above photo shows the main building, the sheet metal shops and storage rooms are in the rear. This is one of the most complete exclusive incubator and brooder factories in the United States, or perhaps in the world. In addition to this they have a large branch house at Columbus, O. During six months of 1901 the Sure Hatch Incubator Co. placed upwards of 11,000 machines, and have an unsolicited testimonial from nearly every patron.

Below we clip a little notice out of the Poultry Gazette, published at Topeka, Kas., referring to the Sure Hatch Incubator Catalogue:

"We always look for something new and original from M. M. Johnson, the successful inventor and manufacturer of the famous Sure Hatch Incubator. This time it comes out in his Annual Catalogue. The book is worth anybody's dollar to read, considering the value of the poultry information contained therein. There are several hundred pages of half-tone photographs of poultry scenes, etc. Every poultry breeder should get a copy of this book. We say the catalogue is worth a dollar, and so it is, but the Sure Hatch Incubator Co. wants to send them free to every poultry raiser."

Dozens of big farm journals and poultry papers speak of the Sure Hatch Incubator Catalogue with the same energy that is noted in the Poultry Gazette mentioning.

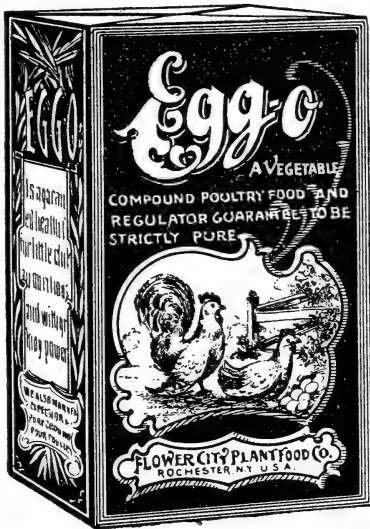

The Sure Hatch Incubators are made of California red wood. Red wood is equal to red cedar to stand heat and moisture; in fact, it is not only good material, but is handsome material. Red wood cases and 12 oz. hard rolled copper tanks—incubators that will last for years, simple in construction, yet they contain all that is necessary to make them a perfect machine. Anyone can operate them—they run themselves. Anyone can own them—the price is right.

Mr. D. C. Ellis, of Sheridan, Mo., writes us that he has read all kinds of catalogues and poultry books, and that he considers the Sure Hatch Incubator Catalogue worth them all.

Mr. John Nash, of Sheridan, Mo., a prominent Poland-China swine breeder, writes us that our Common Sense brooders are a perfect contrivance for raising small chicks, and during a cold, wet spell last spring he saved hundreds of dollars' worth of small pigs by putting them in a brooder until they were strong enough to look after themselves. Whether a farmer raises poultry or not, he would find a Common Sense Brooder a handy thing to have around. You need our handsome Catalogue. Send for it now.

POULTRY FOODS, BETTER THAN GRIT FOR POULTRY.

ARMOUR'S FINE AND COARSE GROUND BONE.

Well dried and ground—clean and free from fat—an aid to digestion—builds up the frame.

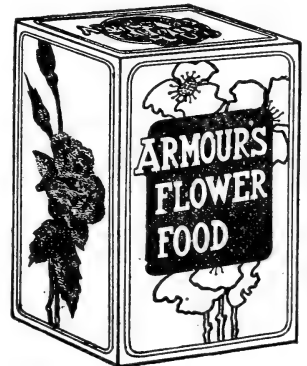

ARMOUR'S FINE GROUND BLOOD.

Rich in egg-making constituents and will increase yield of eggs in winter time, if fed regularly to the hens. An invaluable tonic and assistant to poultry in moulting season. Is a particularly useful food for show birds, for it gives a beautiful lustre to the feathers.

Both the Ground Bone and Blood put up in 1-pound and 5-pound cartons or sold in bulk in 50 pound, 100 pound and 200-pound sacks.

ARMOUR'S ORDORLESS FLOWER FOOD.

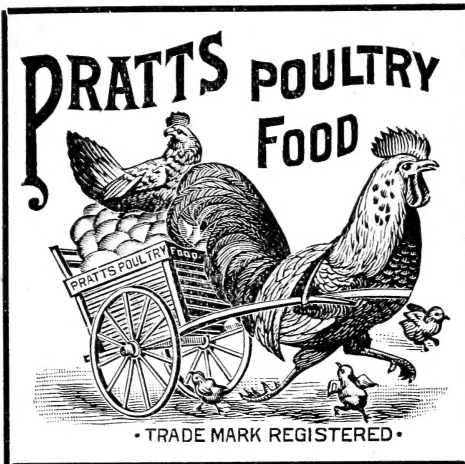

An excellent food for Flowers and House Plants, insuring steady growth, healthy foliage and early bloom. Contains a larger per centage of plant food elements than any other flower food or fertilizer. Does not breed insects, worms or weeds as do stable and vegetable fertilizers. A food—not a stimulant. Results beneficial and permanent. Sold in 1-2 pound and 1-pound packages. Ask your dealer for it, or send **25 CENTS FOR SAMPLE PACKAGE AND BOOKLET ON "HOUSE PLANTS AND GARDEN FLOWERS,"** by Mr. Eben E. Rexford.
